

Senior KG – Paper Twisting Activity (17th July)

The Senior KG students had their Paper Twisting Activity on the 17th of July. The children enthusiastically twisted colourful paper strips using their little fingers and carefully pasted them onto beautiful images drawn by the teacher on chart paper.

The objective of the activity was to develop fine motor skills, finger strength, hand-eye coordination, creativity, patience, and concentration. Twisting the paper strips helped strengthen the small muscles of the fingers, while carefully placing and pasting them onto the images enhanced precision and control.

The children carefully arranged and pasted the colourful twisted paper strips onto the beautifully drawn pictures, bringing each image to life with vibrant colours, texture, and creativity. As they worked, they displayed focus, perseverance, and a sense of accomplishment. The activity also encouraged them to express their imagination while improving their ability to follow instructions and complete a task independently.

The Paper Twisting Activity was a fun-filled and enriching learning experience that combined creativity with skill development. It not only enhanced the children's artistic abilities but also built their confidence.

"LITTLE HANDS AT WORK CREATING BIG SMILES
AND COLURFUL MEMORIES"
