

PAPER TWISTING ACTIVITY

The aim of a paper-twisting activity is to encourage creativity, imagination, and fine motor development in children. It allows students to explore new ways of shaping and designing with simple strips of paper.

Creativity and Expression: Children learn to twist and turn paper into flowers, patterns, and decorative items, promoting artistic skills and innovative thinking.

Focus and Patience: The repeated twisting movement helps students stay calm, concentrate better, and build patience.

Team Building and Collaboration: In a group setting, this activity brings students and teachers together as they share ideas, help each other, and work towards beautiful creations.

Motor Skills: Twisting paper strengthens hand muscles, improves grip, and enhances hand eye coordination among young learners.

In short, it is a joyful, hands-on activity done by the teachers and students of SR. KG A, B and C divisions, helping children learn through fun, teamwork, and creativity.
