

LEAF PRINTING ACTIVITY JUNIOR.K.G.

The young learners of Junior K.G. joyfully participated in a colourful and engaging Leaf Printing Activity conducted on the 3rd of February 2026. This creative experience provided the children with an opportunity to explore nature while learning about colours, shapes, and textures in a fun and hands-on manner.

During the activity, outlines of simple objects were drawn on chart paper. The children used leaves of different sizes and shapes along with bright poster colours. They carefully applied colour to the leaves and gently pressed them onto the outlines, resulting in attractive and unique impressions.

The classroom was filled with excitement and wonder as the children proudly admired their creative artwork. The activity helped enhance fine motor skills, hand eye coordination, encouraged creativity, and fostered an early appreciation for nature, making learning both meaningful and enjoyable.
